HOYT & BASS,

El Paso, Texas.

THE MINES BOOMING.

Good Work Being Done And Mining Men Are Helpful for the Year 1895.

THE QUEEN INCORPORATES.

All Begin With the New Year to Work—Gold Hill Miners Busy—Hatt & Stephens Working 50 Men at Pinos Altos—The Keno a Producer—Incorporators of the Cenozoan—Chance Leads Changes Hands—Copper Flat Mining Wood,

GOLD HILL.

The boys in camp have completed their assessment work and are now nearly all engaged in taking out ore.

Sharp, Clue and Dragoon are working a small force of men on the Blue Bird taking out ore. The mill is being put in first class shape, but it will not be started up until sufficient ore is on hand to justify a long and successful run.

Uncle Dave Eggleston is doing some good work on the Little Chief. It is taking out ore enough to pay all expenses of development work, and still has a reserve on hand.

Henry Snyder is doing development work on his Snyder's Peak properties.

Tom Kister has about completed his yearly assessment work on the Foster properties.

PINOS ALTOS.

The Mountain Key shaft is still being timbered, the unusual amount of work to be done having consumed more time than was calculated on at the beginning. When completed, the mine will be in better shape than ever, and absolutely safe.

The Golden Giant is being worked with vigor. A contract to sink the shaft 100 feet deeper has been let, and work was commenced last Monday.

Hill & Stephens are working about 65 men on their Pacific properties, and they are piling up immense quantities of ore on the dump. The mill has been idle all this week, as new shovels and dies are being put in. With the advent of the New Year these old reliable properties will be prepared to render a better account of themselves than ever in the past.

The Pacific mill near Silver City is being kept running steadily on Spiller and McLean's Pacific lease.

The Atlantic people are working with a run, and they will soon be adding to the tonnage output of the camp. The hoist is in place, and everything is in a condition.

MOGOLLON.

There is but little, if any change to note since last communication. All the mines are working, and the camp is prosperous.

The Maud S. employs a small force of men in opening up new ground. On the 370 level good ore is found in abundance and is being stopeed out. Sufficient ore is being produced to keep five stamps of the mill running continuously. The other ten stamps are being operated on ore produced from leased properties.

The Queen has entered the lists as an ore producer. A considerable body of good ore was encountered recently. It is presumed to be the same as was found in the shaft above, and if such be the case it demonstrates the existence of a continuous ore body several hundreds of feet in length.

The California company is operating the Eborac mine with a small force of men. Louis Grammes is in charge of the work. As development work progresses, considerable quantities of good ore are being extracted.

An effort is being made to lease the Deep Down shaft and mill, but up to the present nothing definite answer from the company has been received, although daily expected. None of the members of the company are interested in the proposition.

CORNER.

This camp is in much the same condition as usual. All the mines of prominence are being worked successfully, and everyone wears a satisfied smile.

The Queen is being worked vigorously under the able management of Superintendent Geo. H. Brown. The shaft is being put down at a rapid rate, but it will be sometime before the tunnel level is reached. Articles of incorporation were filed with the secretary of the territory last week. The incorporators named are, J. N. Sawyer, George Seely, Bertrand Adcox, Hampton Young, John Sealy, H. A. Griffin and Ed Randall, of Galveston, Texas; objects, acquiring and operating mines and reducing ore; principal office, Galveston, Tex., with branches in New Mexico; life twenty-five years; capital stock, \$100,000.

WHITE ATEN.

The Confidence mill is kept busy on ore from the company mines which furnish about 70 tons daily. A body of ore of higher grade than usual has been struck lately, and the management is highly elated thereon. Everything is working smoothly, and the output of bullion is as regular as clock work.

CENTRAL.

Work on all the mines here is being pushed, and the result is a larger production of metal than at any time in

the camp's history. The Texas and Grand Central, it is needless to state continue to produce rich ore in quantity.

Boyle and Parker have surrendered their lease on the Chase, owing to personal trouble. A new lease was made out to other parties Tuesday, and work will be resumed immediately.

With preliminary to extensive operations, to be carried on by Kinsella and his associates, on the Lost Mine lease, should their venture pan out as they anticipate it will, many of the old abandoned workings in this section will be operated in the near future.

WATER SHED.

Aside from several contracts now on hand, this camp appears to be enjoying a siege of inaction. Jesuitude. The mill which was to have been on the ground two weeks ago, has failed to materialize, but as the year is young, it may be, perhaps in running order ere this time a year hence. Large bodies move slowly, and it is possible that the delay may have been occasioned by the magnitude of the undertaking.

COPPER FLAT.

The Syndicate copper mines are being worked systematically, and the output of mineral is fully up to the most sanguine expectations of the management. The operations of the company are not being heralded broadcast, but just the same a large amount of effective work is being done under the direction of Superintendent N. H. Berry, who thoroughly understands his business and has the implicit confidence of his company.

A New High School Course.

The Las Vegas Optic reporter furnishes the following account of the part taken by Prof. J. H. Hatton, of the Deming public schools in the recent meeting of the Educational Association at Albuquerque and also of the proposed new high school course:

On Friday morning, the general subject of discussion was the "New Mexico High School Course." Prof. W. W. Sturms, superintendent of the Iaton public schools, led off on the subject of mathematics. This was followed by a paper on English language and literature, by Miss Josephina Parsons, of the university of New Mexico. Then came J. H. Hatton, principal of the public schools of Deming, on "Foreign Languages." These were very excellent papers the last one bringing out the most diverse opinions. The paper advocated the Latin as the most essential and useful, on account of its being the foundation to so great an extent, of the English language. The statement is made that two-fifths of the English language is taken from the Latin. Quite a number engaged in the discussion of the papers and of the proposed high school course.

Christmas exercises were held in the Congregational and Methodist Churches on Christmas Eve; good programs were rendered and listened to by large gatherings.

The Christmas exercises in the Episcopal Church were carried out most successfully in accordance with the program published in the Herald.

New Year's day was quietly observed in Deming, and the man with the new resolution was among the most conspicuous.

Mr. and Mrs. R. S. Coryell were made happy by the arrival of a son on Wednesday as a New Year's gift. "Hus" is getting along finely.

New Year's day was quietly observed in Deming, and the man with the new resolution was among the most conspicuous.
